

UBC Department of Orthopedics: GRAND ROUNDS

Date: Feb 15, 2012
Speaker: Dr. Simon Horlick,
Division of Arthroscopy, Sports medicine and Joint Preservation
Department of Orthopedics

Topic: Acute Knee Dislocation- Repair, Reconstruct? Right or Wrong ?

Short Summary:

This presentation will focus on current treatment controversies and strategies for the acutely dislocated knee. A Case presentation will attempt to highlight some of these issues

Learning Objectives (Take Home Messages): At the end of this session, participants will be able to:

- 1) treatment principles of the acutely dislocated knee including recognition of neurovascular co-morbidities
- 2) review of the literature surrounding operative vs nonoperative treatment, early vs late surgical treatment, repair vs reconstruction
- 3) outcomes of knee dislocations treated surgically
